8TH ANNUAL CAMP SPRINGS HERBST TOUR (AUTUMN)

SUNDAY  OCT. 19, 2014, 12-6PM

Willkommen (Welcome)

Camp Springs is located ten miles southeast of Cincinnati, Ohio.

Beginning in the middle of the 19th century a small group of German immigrants settled in what is now Camp Springs. Emigrating from wine districts in Germany, they established hillside farms and vineyards using stones to build many homes and various structures.

At one point Camp Springs was part of a small geographic area producing 1/3rd of the national wine output. Campbell County's share was 40% of Kentucky's total wine production and the vineyards in Camp Springs generated 1/5 of that. By the end of the 19th century, the German immigration ended.

After the vineyards were destroyed by blight in the late 19th century, orchards and vegetable products became the chief agricultural staples of the area. Brick and wood became the choice for farm buildings and houses abandoning the once popular stone. Dwellings, taverns, churches and farm complexes contributed to the unique quality of the German settlement in this tiny community known as Hayfield. The work of devoted German immigrants left its mark forever in the hills and stone houses of Camp Springs. Vineyards and wineries are making a resurgence in the early twenty first century.

Rain or shine!
